As discussed when we met on June 18, Valerie, Raymond and I/Grant are making the changes to the portions of the linked template which we agreed upon. Now it is time to link across the different areas. Mark is not available, but has suggested that we each print our respective parts in Pert Chart format and get together to decide on links using the hard copies. When he returns, he can implement the links electronically. For now, please do not replace the template with your changes, but instead save them separately and we can all send them to Mark after this meeting so he can get them into the shared files. Thanks!
